Istanbul Medeniyet University

Computer Engineering
2020 - 2024

SKILLS

- HTML 5
- CSS
- JavaScript
- React
- TypeScript
- Tailwind
- Postgres
- Visual Studio Code
- Git

LANGUAGE

- İngilizce B1

MY PROJECTS

CAPSTONE PROJECT: UPG Projesi

Developed a Single Page Application (SPA) data collection dashboard for World University Rankings that enhances the user experience with real-time data ingestion created for the University Performance Development team at Istanbul Medeniyet University. Ensured data integrity and confidentiality by implementing a user-friendly interface, flexible architecture and security measures for three different user roles. It was developed jointly with a team of 4 people (2 frontend, 2 backend) upon the request of Istanbul Medeniyet University. It is actively used by our school. The technologies we use are: React, Tailwind CSS, Spring Boot, PostgreSQL and AJAX

You can access this and all my other projects on my GitHub.

WORK EXPERIENCE

PART-TIME CIVIL SERVANT İş Bankası - İstanbul- 2023 - 2024

While working here I was responsible for teamwork, time management and various skills beyond software. Working in different areas gave me insight into organisational dynamics and work organisation in a large company. This experience has improved my ability to adapt to changing business needs.

SOFTWARE INTERN İski Genel Müdürlüğü - İstanbul- 2023

During my internship, I focused on mobile application development, I focused on learning React Native. The projects improved both my theoretical and practical knowledge.

SOFTWARE INTERN Saka Soft Yazılım - İstanbul - 2022

During my internship, I focused on web development, I furthered my knowledge of HTML, JavaScript and CSS in order to actively contribute. This experience allowed me to apply the theoretical knowledge.
